

# Garment Store Standard Operating Procedure Examples

**Garment Store Standard Operating Procedure Examples - (SOP)** – A Process management tool for the garment factories. Standard operating procedure (SOP) is not a new thing for the garment industry. SOP is well known and is widely used by many organized factories. SOP can be defined as a step-by-step written procedure about how to do a job that gives desired result and maintains consistency in results. Some stores are both. A retail clothing store is mostly goods. A dry-cleaner offers a service. A tire store sells both a product (tires) and service (installation). Traditionally, the term store meant a brick-and-mortar store, but increasingly people blur the distinction, even referring to online stores. In this post I will be talking about standard procedures (SOPs) of the merchandising department in readymade garment production. Sometimes it is assumed that preparing SOP is a complex task and need an expert to draft an SOP and need thorough analysis and approval before implementation in the system.
